*Insured NOT covered is the **MOST** a patient will spend regardless of their insurance/deductible. If the product **ONLY** has a price in the Savings column that value is the maximum benefit for that product, final price will vary based on deductible and plan formulary.

Our Staff will call your patient within 24 hours of receiving the prescription. Please include ICD-10 code and all failed treatments for faxed and electronic prescriptions.

Prices are subject to change without warning based on patients prescription insurance and manufacturer coupons.
